Content-Based Image and Video Retrieval (Multimedia Systems and Applications) Oge Marques, Borko Furht

Content-Based Image And Video Retrieval addresses the basic concepts and techniques for designing content-based image and video retrieval systems. It also discusses a variety of design choices for the key components of these systems. This book gives a comprehensive survey of the content-based image retrieval systems, including several content-based video retrieval systems. The survey includes both research and commercial content-based retrieval systems. **Content-Based Image And Video Retrieval** includes pointers to two hundred representative bibliographic references on this field, ranging from survey papers to descriptions of recent work in the area, entire books and more than seventy websites. Finally, the book presents a detailed case study of designing MUSE–a content-based image retrieval system developed at Florida Atlantic University in Boca Raton, Florida.

From reader reviews:

Steve Teegarden:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each guide has different aim or goal; it means that publication has different type. Some people truly feel enjoy to spend their time and energy to read a book. They are really reading whatever they have because their hobby is actually reading a book. How about the person who don't like reading a book? Sometime, particular person feel need book when they found difficult problem or maybe exercise. Well, probably you will want this Content-Based Image and Video Retrieval (Multimedia Systems and Applications).

Christopher Morton:

Information is provisions for people to get better life, information these days can get by anyone in everywhere. The information can be a knowledge or any news even a concern. What people must be consider while those information which is from the former life are hard to be find than now is taking seriously which one works to believe or which one often the resource are convinced. If you have the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All those possibilities will not happen in you if you take Content-Based Image and Video Retrieval (Multimedia Systems and Applications) as the daily resource information.

Anna Chew:

People live in this new time of lifestyle always aim to and must have the spare time or they will get lot of stress from both daily life and work. So , if we ask do people have spare time, we will say absolutely indeed. People is human not really a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer will unlimited right. Then ever try this one, reading books. It can be your alternative within spending your spare time, the particular book you have read is actually Content-Based Image and Video Retrieval (Multimedia Systems and Applications).

Theresa Kuykendall:

Many people spending their time frame by playing outside using friends, fun activity together with family or just watching TV the entire day. You can have new activity to enjoy your whole day by reading a book. Ugh, you think reading a book can really hard because you have to use the book everywhere? It fine you can have the e-book, bringing everywhere you want in your Smart phone. Like Content-Based Image and Video Retrieval (Multimedia Systems and Applications) which is keeping the e-book version. So , why not try out this book? Let's see.
