Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications

Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications

Bioprocessing for Value-Added Products from Renewable Resources provides a timely review of new and unconventional techniques to manufacture high-value products based on simple biological material. The current source for most chemicals and materials is petroleum. Anticipation of its limited future availability, along with record high prices has spurred interest in alternatives that will be both sustainable and cost-effective.

In a very structured way this book begins by describing the modern technologies that form the basis for creating a bio-based industry. Next it lists the various organisms that are suitable for bioprocessing -from bacteria to algae- and it gives their unique characteristics. These first two parts set the stage for a variety of novel, experimental bioprocesses, such as the production of medicinal chemicals, the production of chiral compounds and the design of biofuel cells. Concludes with examples where biological, renewable resources become an important feedstock for large-scale industrial production.

Bioprocessing for Value-Added Products from Renewable Resources provides a unique perspective of the industry and the field and serves as an important guide towards the future. The book is suitable for researchers, practitioners, students, and consultants in the bioprocess and biotechnology fields.

- Reviews the principles underpinning modern industrial biotechnology
- Provides a unique collection of novel bioprocesses for a sustainable future
- Gives examples of economical use of renewable resources as feedstocks
- Suitable for both non-experts and experts in the bioproduct industry

From reader reviews:

David Sweet:

Have you spare time to get a day? What do you do when you have far more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a move, shopping, or went to the Mall. How about open or even read a book called Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications? Maybe it is to be best activity for you. You understand beside you can spend your time using your favorite's book, you can cleverer than before. Do you agree with their opinion or you have other opinion?

Clarence McKeever:

A lot of people always spent their own free time to vacation or go to the outside with them family members or their friend. Do you know? Many a lot of people spent these people free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity that's look different you can read some sort of book. It is really fun to suit your needs. If you enjoy the book which you read you can spent 24 hours a day to reading a reserve. The book Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications it is quite good to read. There are a lot of people who recommended this book. These were enjoying reading this book. In case you did not have enough space bringing this book you can buy the particular e-book. You can m0ore quickly to read this book from the smart phone. The price is not too expensive but this book has high quality.

Tony Sanford:

You could spend your free time to see this book this reserve. This Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications is simple bringing you can read it in the playground, in the beach, train and also soon. If you did not possess much space to bring typically the printed book, you can buy typically the e-book. It is make you much easier to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Sheila Rivera:

A lot of e-book has printed but it differs. You can get it by internet on social media. You can choose the best book for you, science, witty, novel, or whatever by means of searching from it. It is identified as of book Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications. You'll be able to your knowledge by it. Without causing the printed book, it might add your knowledge and make you actually happier to read. It is most essential that, you must aware about e-book. It can bring you from one location to other place.
