Allyn J. Thompson, Space

Making Your Own Telescope (Dover Books on Astronomy) Allyn J. Thompson, Space

A book that has been used with great success by countless amateur astronomers, this volume presents complete and detailed instructions and numerous diagrams showing how to construct a do-it-yourself telescope. No complicated mathematics are involved, and no prior knowledge of optics or astronomy is needed to follow the text's step-by-step directions, which also offer instruction in the fundamentals of practical optics. Contents: 1. Story of the Telescope. 2. Materials and Equipment. 3. Mirror Grinding. 4. The Pitch Lap. 5. Polishing-Testing-Correcting. 6. The Paraboloid. 7. The Diagonal. 8. Tube Parts-Alignment-The Finder. 9. Eyepieces and Related Problems. 10. The Mounting. 11. Aluminizing and Cleaning. 12. Setting Circles-Equatorial Adjustment. 13. Optical Principles-Atmosphere-Magnitudes. 14. A Second Telescope. Appendixes. Index.

From reader reviews:

Linda Haag:

As people who live in typically the modest era should be up-date about what going on or details even knowledge to make them keep up with the era that is always change and make progress. Some of you maybe can update themselves by reading through books. It is a good choice for yourself but the problems coming to an individual is you don't know what kind you should start with. This Making Your Own Telescope (Dover Books on Astronomy) is our recommendation so you keep up with the world. Why, because book serves what you want and wish in this era.

Dorothy Tran:

Reading a publication can be one of a lot of activity that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new information. When you read a book you will get new information mainly because book is one of various ways to share the information or maybe their idea. Second, reading a book will make an individual more imaginative. When you examining a book especially fiction book the author will bring you to imagine the story how the character types do it anything. Third, it is possible to share your knowledge to some others. When you read this Making Your Own Telescope (Dover Books on Astronomy), you could tells your family, friends in addition to soon about yours book. Your knowledge can inspire the others, make them reading a reserve.

Brian Grant:

This Making Your Own Telescope (Dover Books on Astronomy) is great guide for you because the content which is full of information for you who all always deal with world and have to make decision every minute. This specific book reveal it facts accurately using great arrange word or we can point out no rambling sentences inside. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only will give you straight forward sentences but tough core information with beautiful delivering sentences. Having Making Your Own Telescope (Dover Books on Astronomy) in your hand like having the world in your arm, data in it is not ridiculous one. We can say that no book that offer you world inside ten or fifteen second right but this reserve already do that. So , it is good reading book. Hey Mr. and Mrs. busy do you still doubt this?

Loyd Tyler:

Reading a book for being new life style in this year; every people loves to go through a book. When you read a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you would like get information about your examine, you can read education books, but if you act like you want to entertain yourself read a fiction books, this kind of us novel, comics, and also soon. The Making Your Own Telescope (Dover Books on Astronomy) provide you with a new

experience in examining a book.
