Learn How to Properly Analyze Categorical Data
Analysis of Categorical Data with R presents a modern account of categorical data analysis using the popular R software. It covers recent techniques of model building and assessment for binary, multicategory, and count response variables and discusses fundamentals, such as odds ratio and probability estimation. The authors give detailed advice and guidelines on which procedures to use and why to use them.

The Use of R as Both a Data Analysis Method and a Learning Tool
Requiring no prior experience with R, the text offers an introduction to the essential features and functions of R. It incorporates numerous examples from medicine, psychology, sports, ecology, and other areas, along with extensive R code and output. The authors use data simulation in R to help readers understand the underlying assumptions of a procedure and then to evaluate the procedure's performance. They also present many graphical demonstrations of the features and properties of various analysis methods.

Web Resource
The data sets and R programs from each example are available at www.chrisbilder.com/categorical. The programs include code used to create every plot and piece of output. Many of these programs contain code to demonstrate additional features or to perform more detailed analyses than what is in the text. Designed to be used in tandem with the book, the website also uniquely provides videos of the authors teaching a course on the subject. These videos include live, in-class recordings, which instructors may find useful in a blended or flipped classroom setting. The videos are also suitable as a substitute for a short course.

From reader reviews:

Thomas Hayden:

A lot of people always spent their very own free time to vacation or maybe go to the outside with them household or their friend. Do you realize? Many a lot of people spent they will free time just watching TV, as well as playing video games all day long. If you would like try to find a new activity this is look different you can read any book. It is really fun for you personally. If you enjoy the book that you simply read you can spent all day long to reading a book. The book Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) it is rather good to read. There are a lot of those who recommended this book. We were holding enjoying reading this book. Should you did not have enough space to create this book you can buy typically the e-book. You can m0ore quickly to read this book from your smart phone. The price is not too costly but this book has high quality.

Timothy Payne:

Reading a book to become new life style in this calendar year; every people loves to read a book. When you examine a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your examine, you can read education books, but if you want to entertain yourself look for a fiction books, these us novel, comics, along with soon. The Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) provide you with a new experience in reading a book.

Danny Johnson:

In this particular era which is the greater person or who has ability to do something more are more valuable than other. Do you want to become among it? It is just simple way to have that. What you are related is just spending your time almost no but quite enough to possess a look at some books. On the list of books in the top checklist in your reading list is definitely Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science). This book and that is qualified as The Hungry Mountains can get you closer in turning out to be precious person. By looking upward and review this publication you can get many advantages.

Ruth Haddock:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book ended up being rare? Why so many issue for the book? But any kind of people feel that they enjoy regarding reading. Some people likes examining, not only science book but in addition novel and Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) or maybe others sources were given information for you. After you know how the good a book, you feel desire to read more and more. Science reserve was created for teacher or even students especially. Those books are helping them to increase their knowledge. In

some other case, beside science reserve, any other book likes Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) to make your spare time considerably more colorful. Many types of book like here.
