## **Aliens Among Us: The Truths of Unknown Life in our Galaxy and Actual Abductions (True Apparitions Book 11) Andrea G.**

There is no human on Earth who hasn't wondered at least once about the possibility of other intelligent life, besides us, in this vast universe that we call home. Our busy scientists have already managed to pinpoint some planets which possess a certain kind of habitability for some kinds of life forms to survive, and dare we say, even thrive? We all picture our distant future somewhere else, on another planet, maybe even another galaxy, with other alien life forms surrounding us.

We've been looking up towards the skies ever since the old days of yore. We've been imagining visits from outer space and extraterrestrials for centuries, and human history shows no lack in art representations of this ancient idea, which has been occupying our minds for so long. Recently, we even managed to send a message into outer space, hoping for a reply.... but nothing so far.

As accounts would deem, there are numerous individuals who claim to have been either visited or even abducted by alien life forms, such as the Andromedans, reptilians, little green men, Greys, etc. Just some of these people include Elizabeth Klarer, Antonio Vilas-Boas, Frederick Valentich, Robert Taylor and many others. They claimed to have been taken onboard space crafts, which apparently come to us in numerous forms: mysterious airships, flying saucers, ghost rockets, black triangles, etc.

Of course, no mention of aliens would be complete without the mysterious crop circles, believed to have been created by benevolent extraterrestrials themselves or the infamous Roswell incident, which still, after all these years, remains as the pinnacle of government conspiracies about extraterrestrial life contacting planet Earth.

Whether you yourself believe this idea or not, what matters is that so many others do, and the old saying does go: where there's a spark, there's a flame. So, suspend your disbelief and open your mind to something that goes beyond anything you ever thought possible.
