Lost Ancient High Technology Of Egypt: Traveler's Edition Brien Foerster

The history of Egypt is of course a rich one dating back at least 5000 years to the first of the Pharaohs who created what was to be remembered through their works and deeds, especially in stone. Among their most famous achievements are the Great Pyramids of the Giza Plateau and the Sphinx. However, what if evidence strongly suggests that some of these great works were in fact created thousands of years before the dynastic Egyptians, and that the Pharaohs simply inherited and renamed them? This book is a journey from the southern most area of Egypt all the way to the Giza Plateau. Along the way many stone structures were examined that appeared to have been at least partially created using advanced technologies that the Pharaohs simply did not have; technologies that in some cases appear superior to our own. Geologists, stone masons, engineers and other professionals were consulted in order to create this work, along with experts on the oral traditions of this extremely ancient land, and the results will surprise you. Clearly there was a civilization before the Pharaohs who had advanced technologies, and these people were called the Khemitians.
